# ROCKET LEAGUE

## WHY IT ROCKS!

### FACT!

ROCKET LEAGUE WAS DOWNLOADED OVER FIVE MILLION TIMES IN LESS THAN A MONTH!

Ever since **Rocket League** was released on Steam and for free on PlayStation Plus it has taken the world by storm! But why is it so awesome? Let's take a look!

### 1 THE GAMEPLAY IS SIMPLE... AND AWESOME!

**Rocket League** is basically football played with cars! The controls are really easy but mastering these controls is the difference between failing hard like a noob and killing it like pro!

### 2 EVERY SECOND COUNTS!

There is always time for a comeback. Our best comeback is scoring four goals in the last 45 seconds to win 6-5!

### 3 EPIC HIGHS AND LOWS!

We've never felt so happy than when we're beating our mates! However, we were destroyed in the rematch!

### 4 PLAYING WITH MATES!

**Rocket League** gets so much better when you're playing online! 4v4 MP matches are what the internet was invented for!

ROCKET LEAGUE

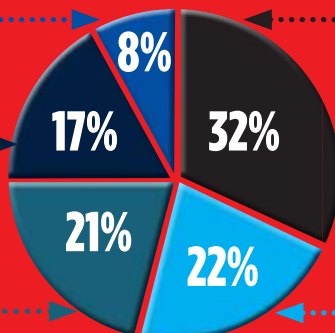

### BREAKDOWN OF AN AVERAGE MATCH:

Scoring epic goals!

Switching Ball Cam on and off to find the ball!

Trolling your mates!

Screaming at the TV – even if you're winning!

Smashing into the other cars!

# GAME REVIEW

**GENRE:**  
Sports

**PLATFORM:**

## FIFA 16

**IT'S THAT TIME OF YEAR AGAIN... BUT IS FIFA 16 THE PITCH PERFECT GAME WE WERE HOPING FOR?**

As soon as you start your first match you'll notice that **FIFA 16** looks and sounds even better than last year – the players seem to have more natural animations, the graphics are crisper, the atmosphere is bigger, the commentary more accurate and overall, the game feels much more alive.

The attention to detail is impressive, with referees using vanishing spray and cameramen following the ball pitchside. There is a lot that has been changed here and mostly for the better.

The biggest area of change this year is in defence. Last year it was way too easy to just run the ball past defenders and knock it into the net – well, those days are over! Defenders have improved marking, make more interceptions and can

**"FIFA 16 HAS LOTS OF CHANGES FOR THE BETTER!"**

turn just as quick as the attackers – all of which make it much tougher to score.

Although it does make the game much harder and also a bit less exciting. The goalies are also a lot smarter and less likely to cause game-breakingly bad mistakes like last year. Keepers attack the ball more aggressively and often pull off fantastic saves to help keep the ball out of the net!

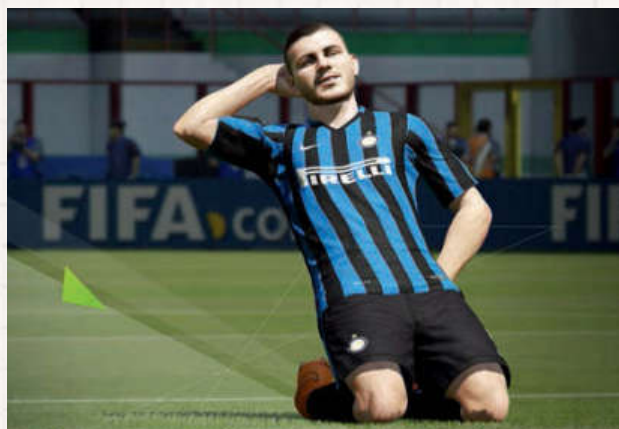

Crossing has also been altered, with crosses being swung in ahead of the attackers, giving them the chance to run on to the ball and smash it home!

The game has further changed in that skills such as finesse shots and short corners don't always lead to a goal the way they did previously.

HANG ON...  
YOU'VE GOT A  
HAIR OUT OF  
PLACE!

EW

If any of the changes aren't quite as good, we would say it's the passing. Although passing is crisper and quicker, it is now much more sensitive and you have to be really precise to make your passes accurate. Unskilled players can make a lot of poor passes which will cost them the game.

A new **FUT** game mode, **Draft**, has also been introduced. You can enter a **Draft** – for a small fee – and are assigned a random set of players for each position. Once you've made up your

team, you play four matches and earn rewards. Winning, of course, will net you better rewards, so try to grab those wins!

## GIRL POWER!

For the first time ever you can choose to play as one of 12 international womens teams.

The women's matches offer a lighter style of play thanks to authentic performance capture of star players like USA's **Alex Morgan** and England's **Stephanie Houghton**. The players look and move just like they do in real life!

## THE RESULT

**OVERALL, FIFA 16 IS A BETTER GAME IN EVERY WAY TO 15 AND IS A DEFINITE BUY IF YOU'RE A FIFA FAN!**

# PES 2016

**PES HAS BEEN ON OUR GAMING SCREENS FOR 20 YEARS, BUT HOW DOES THIS YEAR'S HELPING SHAPE UP?**

The beautiful game has returned! As soon as you switch it on, you'll notice that **PES** looks better than ever, from the menu screens to stadium and player graphics — the game looks crisp.

What gives **PES 2016** the edge over its arch rival, **FIFA**, is simply gameplay. Players feel quicker and are responsive to your commands — it feels real! Even the way the ball moves looks more realistic.

**PES** is a lot of fun and gives you a sense of freedom that it hasn't in the past. You can spray passes about the pitch, attempt cool shots and score sick goals!

**"PLAYERS FEEL QUICKER AND ARE RESPONSIVE TO YOUR COMMANDS — IT FEELS REAL!"**

Once you master it you can score brilliant technical goals and long range shots — what's not to love?

Another part of the game which has improved is tackling. When you get your timing right in **PES**, nothing feels more awesome than winning a last ditch slide tackle. Also, 50/50 challenges are less predictable than previous games — players are more physical and fight for possession with a different outcome every time!

On top of all this, keepers are more alert and seem to very rarely make mistakes in between the sticks — there's nothing worse than a dodgy keeper, right?

There are a couple of areas where **FIFA** still comes out on top. The **MyClub** mode is definitely better than before, but still doesn't feel as cool as **FUT**. Also, **PES** will always struggle to get a license that'll allow them to use every real player and club – something **FIFA** doesn't have to worry about.

One awesome new feature allows you to import and download edited kits. This means real Premier League

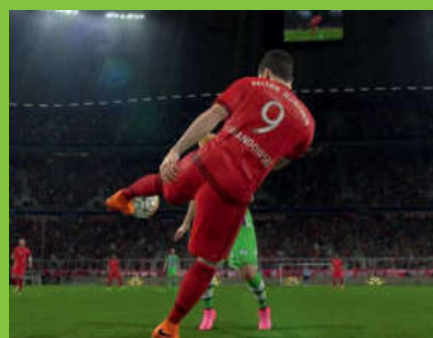

kits and team badges — something that makes **PES** even cooler! We don't know about you, but Chelsea look a lot better with their classic blue strip instead of the

weird default yellow and white one!

That said, for

a realistic and enjoyable football experience **PES** hits the back of the net every time!

**"NOTHING FEELS MORE AWESOME THAN WINNING A LAST DITCH SLIDE TACKLE."**

## VERDICT

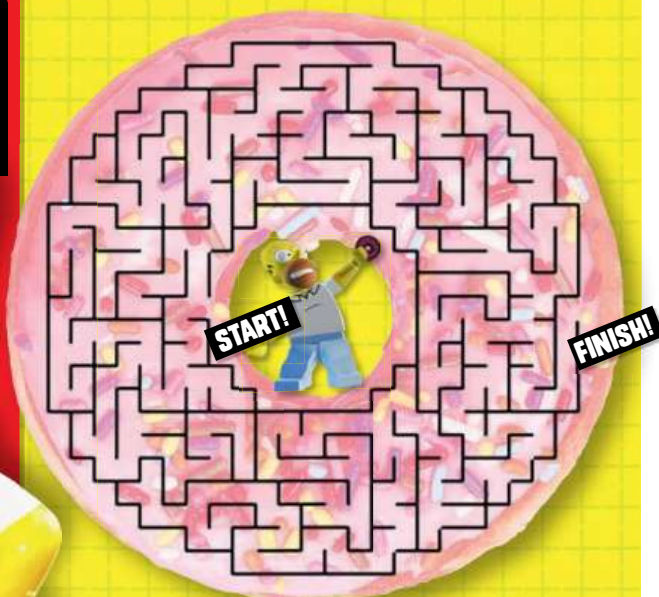

IT'S A CLOSE ONE, BUT WE THINK **PES 2016** EDGES OUT **FIFA** AS THE BEST FOOTBALL GAME THIS YEAR. IT'S QUICKER, YOU FEEL MORE IN CONTROL AND ULTIMATELY IT IS MORE FUN TO PLAY!

## SKYLANDERS REVIEW

REV YOUR WHEELS. START THE PROPELLERS AND DIVE IN TO THE BRAND NEW IN **SKYLANDERS SUPERCHARGERS!**

It's stormy times in Skylands as Kaos is taking over with his Doomstation Of Ultimate Doomstruction! You are faced with saving all of Skylands with the help of the awesome new Superchargers, question is should you take on this challenge? Answer: 110% yes!

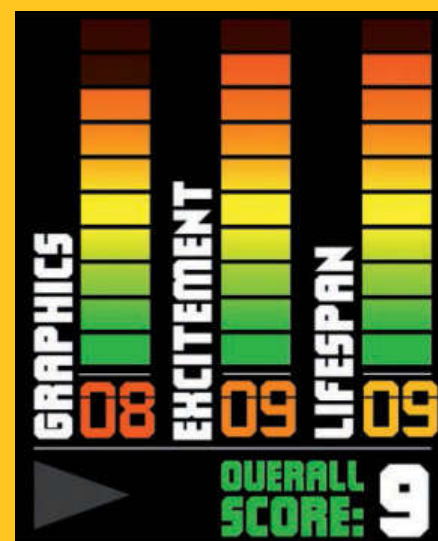

The starter pack includes a portal, two characters, game disc, and the sick Hot Streak car! If you want to take on air and water challenges you'll need to splash out for more vehicles.

Superchargers' storyline and character interaction definitely delivers and is well-thought out. The levels are unbelievably fun and each has a cool and unique design element. From fighting a giant chicken, riding a dragon or searching through the clouds – this game is not short of imaginative challenges.

New to the game is racing - they're pretty fast paced and it's all to play for as you can easily fall from 1st to 8th and claw your way back to the front. Shooting other vehicles is a cool twist and can seriously help you take down your rivals!

The tracks are all completely different but totally awesome which makes every race exciting! If you're taking a spin on the Dragon Spine track - look out for the fire and ice dragons making life tricky, or if you're flying through Calamity Canyon beware flying veggies in a massive food fight!

The actual vehicles have movable wheels, propellers and even cushy hovercraft bags, making them feel great in real life and in-game! All in all, Superchargers is an epic game and racing is a great addition to the series! We love Superchargers and you will too!

## VERDICT

**SKYLANDERS SUPERCHARGERS** RACING FEATURES ARE WORTH BUYING THIS GAME FOR ALONE! WITH SO MANY DIFFERENT WAYS TO PLAY, IT'S DEFINITELY GOT ENOUGH CONTENT TO KEEP YOU AND YOUR MATES PLAYING FOR A LONG TIME!

# HOW TO BEAT

# MOON LORD

**TERRARIA'S LAST BOSS IS TOUGH TO BEAT  
- HERE'S OUR GUIDE TO VICTORY!**

YOUTUBE (10)

## MOON LORD STATS

### HEAD

- 45,000 Health
- 50 Defence

### HANDS (each)

- 25,000 Health
- 40 Defence

### CORE

- 50,000 Health
- 70 Defence

## FIGHTING MOON LORD:

Our strategy is to hurt both hands until they are at very low health, then kill the head. As soon as you kill the head, kill the two hands. This strategy causes the invincible eyes that come out of his hands to appear later in the fight, which makes it easier.

GIMME FIVE!

## BEFORE THE FIGHT:

To summon Moon Lord, you must complete the Lunar Event. Moon Lord spawns as soon as you destroy the fourth tower, so make sure you're ready for battle before you do this.

## HANDS

When attacking the hands, focus on the eyes. Make sure your attacks count, only attack when the eyelid is open.

The easiest way to beat him is to fight in a large flat space, so create an area like this first. Moving around a lot makes it much easier, so keep running from side to side when attacking him.

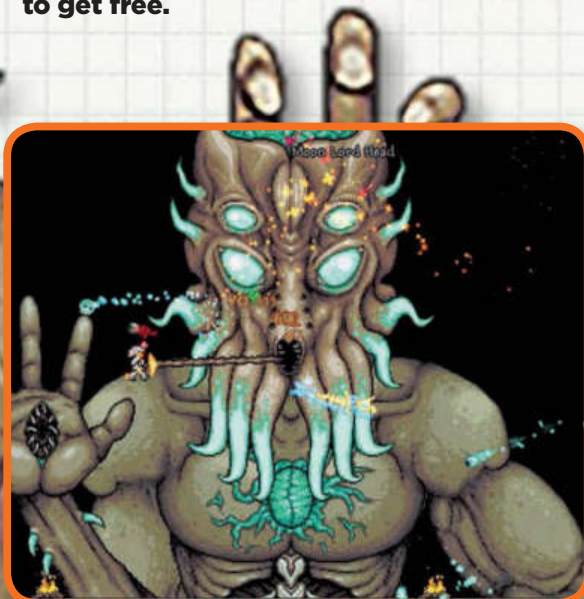

# RD!

## HEAD

When the hands are really low health it's time to take out **Moon Lord's** head. The head is hard to kill as it has a lot of health and powerful attacks — the phantasm beam attack can do over 100 damage!

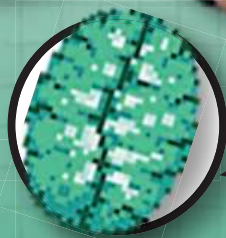

His tongue attack drains the player's life with particles travelling up the tongue — destroy these particles before they reach his mouth, as each particle heals him 1000hp. The tongue attack also has a debuff that stops you from regaining your health. If his tongue latches on to you run away to get free.

## CORE

Once the head and hands are dead his heart will appear. This can be hard to hit as it sometimes dips beneath the ground — jumping or flying will get him higher so you can hit it.

Continue attacking his core until you finally kill the boss!

## Terraria MOON LORD TOP TIPS

■ Craft weapons from pillar fragments and wear the strongest armour you can before the fight.

■ Keep your **Nurse** near your spawn point. If your health dips to around 250 teleport to her to heal yourself.

■ Having a UFO mount like a Cosmic Car Key or Shrimpy Truffle makes the fight much easier due to their unlimited flight.

■ Ranged weapons will give you a better chance at taking him out. Choosing a melee set makes this boss much, much harder.

■ **Moon Lord** uses Moon Bite debuff which disables Vampire Knives and the Spectre Hood so avoid these items.
